

CETRAD & INTEGRURAL SUMMER SCHOOL 2022

DEVELOPMENT IN PLACE: PROSPECTS, EXPERIENCES AND APPRENTICESHIPS

International Summer School of the Centre for Transdisciplinary Development Studies and the Integrural project – Capacity Building for Integrated Sustainable Development in Rural Areas

MAY
30 to JUNE
03

VILA REAL, CHAVES
BOTICAS, MONTALEGRE
PORTUGAL

The purpose of Development in Place: Prospects, Experiences and Apprenticeships Summer School is to identify, understand and reflect about approaches, strategies, processes and practices which have been contributing to the transformation and vitalization of the Portuguese inland rural and peripheral areas. Its main goals are: (i) Strengthen the familiarization with the theoretical frames, models and policies that guide innovation, competitiveness, sustainability and territorial transformation, focusing particularly on place-based socio-economic development models; (ii) Compare conceptual models with concrete cases in order to produce reflexivity and dialectic reasoning between theory and empirical reality; (iii) Understand the debates around the different development models and perspectives as well as the political-economic non-recognition of many local initiatives and strategies; (iv) Encourage participants to comprehend the views held by the agents in the territory and to perceive the eventual political constraints that hinder innovative initiatives and territorial transformation; (v) Improve methodological, analytical, scientific writing and publishing competences,
